

Abortion Hurts Her, Too

Loving women means providing options that uphold women's lives.
Abortion hurts women physically, emotionally, and spiritually.

Breast Cancer

Although it is a hotly contested issue, abortion has been **positively associated with breast cancer** in 19 different studies.

Miscarriage

Abortion is associated with an **increased risk of first-trimester miscarriage** in subsequent pregnancies.

Mental Health

10% of mental health problems suffered by women are **directly attributable to abortion**. Post-abortive women score higher on depression scales and have higher rates of suicide, eating disorders, and sleeping disorders than women who have not had an abortion.

Sleep Disturbances

Women who undergo abortions after 13 weeks report disturbing dreams, more frequent reliving of the abortion, and more trouble falling asleep than other women.

Death

Maternal mortality from medication abortion increases exponentially by 38% each week of gestation after 10 weeks.

Word of Hope

If you or a woman you know are thinking about an abortion or are suffering from a past abortion, contact Word of Hope, a 24/7 for-life abortion recovery hotline, at (888)-217-8679.
